## **I. INTRODUCTION**

On August 2, 1996, the United States Congress passed the Safe Drinking Water Act (SDWA), 1976 PA 399, amendments of 1996 (P.L.104-182). This legislation authorized the creation of a revolving fund to provide low-interest loans to qualified water suppliers for repairs or enhancements to public water supply systems. In theory, this fund would be very similar to the State Revolving Fund (SRF) created to assist water pollution control projects.

Michigan responded to the new federal program by creating the Drinking Water Revolving Fund (DWRF). As with the SRF, the DWRF is co-administered by the Michigan Department of Environmental Quality (MDEQ) and the Michigan Municipal Bond Authority (MMBA). The MDEQ handles all programmatic issues, while the MMBA serves the program with its financial expertise.

While there are many similarities between the SRF and the DWRF, there are some notable differences. For instance, the SRF is permitted to fund only municipalities, while the DWRF may include privately owned community water suppliers and not-for-profit non-community water suppliers. The SRF has very limited set-aside funds, whereas the DWRF makes liberal use of special set-asides to fund administration, capacity development, source water protection, source water assessments, etc. The loan repayment period in the SRF is limited to 20 years, while the DWRF can extend up to 30 years for communities that qualify as "disadvantaged."

## **II. PROGRAM CONTACTS**

For financial issues dealing with the bonding structure, bond documents, financial detail and audit results, contact:

Mr. Thomas Letavis, Executive Director  
Michigan Municipal Bond Authority  
Treasury Building  
Lansing, Michigan 48922  
517-241-9500  
levatist@michigan.gov

For technical reviews of DWRF projects, permit issuance, and administration of the set-aside programs authorized by the SDWA, contact:

Mr. James Cleland, Chief, Lansing Operations Division  
Water Bureau (WB)  
P.O. Box 30273  
Lansing, Michigan 48909-7773  
517-241-1287  
clelandj@michigan.gov

For program oversight, grant administration, and project management issues, contact:

Mr. Chip Heckathorn, Chief  
Revolving Loan and Operator Certification Section (RLOCS)  
Environmental Science and Services Division  
P.O. Box 30457  
Lansing, Michigan 48909-7957  
517-373-2161  
heckathc@michigan.gov

### **III. PROGRAM STRUCTURE**

Michigan operates the DWRF within a financing structure similar to that of the SRF. We offer loans to qualified applicants who possess at least investment grade credit. Investment grade credit may be demonstrated by a separate credit rating or a credit assessment letter from one of the rating agencies, by a pledge of state revenue sharing with sufficient coverage, or by credit enhancement. Michigan law allows for a county or a public authority to issue debt on behalf of underlying communities. The investment grade credit must be approved by the MMBA for the entity issuing the debt. For water suppliers who are municipalities with granted bonding authority, this presents no significant challenges.

The DWRF sells tax-exempt revenue bonds to provide money that is used to reimburse communities for incurred costs. The most recent bond issue occurred in July 2005 for \$80,000,000. Both the DWRF and the SRF 2005 Revenue Bonds received the highest ratings from Fitch (AAA), Moody's Investor Services (Aaa), and Standard and Poor's (AAA). These ratings demonstrate a high level of confidence in the structure and administration of Michigan's infrastructure programs. As the DWRF reimburses suppliers, federal funds from the capitalization grant and state match funds are transferred into a debt service reserve account to provide coverage for the leveraged bond issue.

### **IV. LONG-TERM GOALS**

Michigan's DWRF established a new funding source designed to protect and preserve public health within the state's boundaries. Michigan's geographical identity as a Great Lakes state affords its citizens with an abundant and high quality water resource from which to draw its drinking water. Unlike many states, Michigan water supplies are plentiful and periods of restricted use are few and far between in most communities. Given our abundant water resource, the challenge for water suppliers lies in protecting the high quality of the resource as well as ensuring that adequate volume and pressure exist to deliver potable water to the customer.

In light of the interest in protecting public health, the MDEQ and the MMBA have undertaken efforts toward the attainment of Michigan's long-term goals as stated in the Intended Use Plan (IUP):

- A. To maintain statewide compliance with all applicable state and federal drinking water laws, rules, and standards.
- B. To protect the public health and environmental quality of our state.
- C. To maintain Source Water Assessment, Source Water Protection, and Wellhead Protection Programs.
- D. To develop strategies within the DWRF to assist smaller, economically disadvantaged communities in meeting drinking water standards.
- E. To promote the DWRF as a viable tool for use by Michigan water suppliers in financing their waterworks system improvements or upgrades.
- F. To secure Michigan's full share of federal funding and to expeditiously obligate these funds, along with the state contributions, for the construction of eligible facilities that meet state and federal requirements.

- G. To develop effective partnerships with other federal and state financing sources to promote efficiency in environmental review procedures and coordination of funding.
- H. To apply a Capacity Assessment Program for all new and existing community and non-transient non-community water supplies.
- I. To continue operator certification program requirements to assure proper operation and maintenance of public water systems.

Michigan is proud of its accomplishments in promoting compliance with all applicable drinking water requirements. Prior to the creation of the DWRF, project financing for community water supply was left largely to local units of government or to individuals investing in their own systems. The DWRF provides a source of infrastructure financing that assists communities in protecting both public health and well being. In fiscal year (FY) 2006, 15 loans were made totaling \$36,925,000. This brings the DWRF to a total assistance of \$417,935,000 for 141 water supply projects since 1997, see Attachment 1 – DWRF Funded Projects by Binding Commitment Date.

The following provides the cost breakdown by project category of all projects funded to date. Attachment 2 - DWRF Funded Projects by Category Costs Dollars is a complete listing of all the projects.

I. Transmission/Distribution	\$208,211,181
II. Treatment	\$143,495,073
III. Storage	\$ 43,562,679
IV. Source	\$ 19,933,620
V. Other	\$ 2,732,447
<b>TOTAL</b>	<b><u>\$417,935,000</u></b>

The DWRF funds projects of varying population size. The following shows the dollar amount of projects funded by population size since the inception of the program.

Population less than 3,500	\$ 86,880,000
3,500 to 9,999	\$ 77,915,000
10,000 to 99,999	\$177,215,000
over 100,000	<u>\$ 75,925,000</u>
<b>TOTAL</b>	<b>\$ 417,935,000</b>

## V. SHORT-TERM GOALS

In order to accomplish the long-term goals, we focused on more immediate objectives. Our short-term goals in FY 2006 were:

**A. *To continue our outreach effort to publicize the DWRF through direct mail, electronic media, newsletter publication, workshops, and meetings.***

Our outreach efforts have been very successful. Program managers continue to meet with interested public water suppliers, consulting engineers, and associations with an interest in water supply issues. In addition, substantial program information is available through the internet on the MDEQ's web site.

**B. *To continue implementation plans for source water protection focused on statewide surface water assessments and groundwater assessments in areas tributary to the Great Lakes.***

The 1996 amendments to the federal SDWA required states to submit Source Water Assessment Programs (SWAP) by February 6, 1999, for Environmental Protection Agency (EPA) approval. Michigan's SWAP was submitted on time and approved by the EPA in October 1999. The SWAP Advisory Committee has met 15 times since 1997 to develop the SWAP and assist with technical and public involvement issues.

The intent of the SWAP is to identify the areas that supply public drinking water; inventory contaminants and assess water supply susceptibility to contamination; and inform the public of the results. Michigan has completed assessments for 11,833 community and non-community public water supplies with an estimated 18,000 sources assessed.

In 1997, the state of Michigan reserved the maximum allowable, one-time 10 percent set-aside for SWAP of \$5,968,110 from the initial federal capitalization of the DWRP. There were no SWAP expenditures in FY 1997, but there were expenditures of \$372,879 in FY 1998, \$1.4 million in FY 1999, \$1.1 million in FY 2000, \$825,000 in FY 2001 and \$1.2 million in FY 2002. An updated SWAP Workplan/Budget was submitted to the EPA in October 2001 and approved on December 6, 2001, to allow full expenditure of the initial SWAP set-aside through May 2003. EPA accepted further extension of the Michigan SWAP through December 2003. With EPA concurrence, the remaining dollars (approximately \$500,000) of the SWAP set-aside were transferred to the Wellhead Protection set-aside.

In April 2006, the Michigan Source Water Protection Program also hosted the 7<sup>th</sup> Annual Non-Community Source Water Protection Training Workshop for local health department staff.

***C. To continue the State's Wellhead Protection Program through the implementation of matching grant programs.***

Efforts to enhance wellhead protection areas of community water supplies embrace two fronts. During FY 2006, the WB continued efforts to develop and implement local Wellhead Protection Programs under the existing voluntary state program by administering the seventh round of matching Wellhead Protection Grants. Following is the history of grant awards in this program since its inception:

FY 1999	54 communities awarded	\$1,014,044
FY 2000	62 communities awarded	\$1,080,390
FY 2001	66 communities awarded	\$1,044,266
FY 2002	85 communities awarded	\$1,286,589
FY 2003	84 communities awarded	\$1,260,180
FY 2004	67 communities awarded	\$ 857,772
FY 2005	57 communities awarded	\$ 848,143
FY 2006	50 communities awarded	\$ 682,029
FY 2007	43 communities awarded	\$ 677,629
Total to Date	568 awards	\$8,751,042

During FY 2006, the WB continued to fund the Clean Michigan Initiative (CMI) Abandoned Well Management (AWM) Grant projects. This comprehensive 75 percent state-share grant program pays for locating and plugging abandoned wells identified inside wellhead protection areas of community public water supply source wells. The following is the history of grant awards in this program since its inception:

FY 2001	36 communities awarded	\$1,200,000
FY 2004	11 communities awarded	\$1,100,000
FY 2005	17 communities awarded	\$ 940,000
Total to Date:	64 communities awarded	\$3,240,000

The first round of AWM grant contracts was successful in locating and plugging over 500 abandoned wells.

The second round of grants is currently underway with 9 communities having completed their projects and the remaining 2 are working on their plugging phase.

Communities participating in the third round of grants that were awarded in 2005 have started their abandoned well search phase and will be scheduling their plugging effort in the spring of 2007.

The WB allocated and spent \$225,000 from the set-aside funds for administration of the AWM Program in FY 2006. Administration and coordination of the statewide AWM Program is provided out of the Lansing office of the WB. Staff expenses included one full-time equivalent (FTE) assigned to the Drinking Water and Environmental Health Section to coordinate AWM Program activities and one FTE working with the associated groundwater database. The statewide AWM Program is implemented in the field through local health department operations contracts and by WB staff stationed in district offices. Program highlights from FY 2006 included:

- Conformance with abandoned well plugging requirements on replacement well sites was estimated to be 90 percent on a statewide basis, based upon activity reports provided by local health department quarterly reports.
- Abandoned well plugging activities were completed at all first round grant communities and 9 of the 11 for the second round of grant communities.
- WB continued specialized training programs intended for registered well drilling (plugging) contractors, local health department staff, and Michigan Department of Agriculture's contracted Conservation District staff highlighting new technical procedures for plugging abandoned flowing artesian wells, plugging abandoned wells terminated in fractured bedrock, and using specialized tools for removing obstructions from abandoned wells.
- Two grantee communities participating in the third round of CMI-AWM grants have already located and gained participation agreements to plug over 200 abandoned wells inside their wellhead protection area.
- One second round grantee is using the latest in Geographical Information System technology interfaced with their community public water utility management system to identify potential sites of abandoned wells, schedule field investigations, and ultimately assign work orders to have the abandoned wells plugged by a third-party abandoned well plugging contractor. They have located and plugged over 100 abandoned wells using this state-of-the-art methodology.

***D. To continue a Technical Assistance Program for small communities.***

Existing staff in the WB and RLOCS administer this program. During FY 2006, one community, Sanilac Township, qualified for disadvantaged community set-aside funds. Sanilac Township received \$74,030 from the Technical Assistance Set-Aside for reimbursement of their planning costs.

The Technical Assistance contractor continued to work with systems, especially nontransient noncommunity systems that have arsenic levels greater than 10 micrograms per liter (ug/l). Part of this service consists of meeting with these systems and working with them to develop strategies for meeting the maximum contaminant level.

The WB and RLOCS have also partnered to conduct financial assessments of small systems that have received a less than satisfactory rating in a recent sanitary survey and are not making progress toward correcting the deficiencies due in some part to financial

difficulties. The criteria have been expanded recently to allow systems that could benefit from a financial assessment to be included. As a result, several systems that are currently in compliance but concerned about future challenges like meeting the revised arsenic standard have participated and are now making progress by improving their financial capacity so they can afford necessary capital improvements.

These financial assessments are being performed by a financial analyst from RLOCS. The analyst conducts an assessment of the community's existing financial health that includes a review of financial documents and an on-site meeting with system representatives. A Financial Action Plan is then developed that includes short-range and long-range goals along with a step-by-step process to reach these goals. Useful tools such as a sample water ordinance, a service agreement checklist, and templates that assist in identifying the cost of any needed capital improvements are also provided. Possible financing options are also discussed.

Other Technical Assistance contracts included a statewide sampling program and community system training program. Samples collected from select water systems allowed the majority of water systems to waive costly EPA compliance sampling in accordance with Michigan Phase II/V Contaminant Waiver Program. Sampling parameters included dioxin, asbestos, and selected organic compounds from 50 targeted and random sites. The Community Water Supply Training contract included the development of 10 training modules covering various community drinking water issues. After development, the modules were pilot tested at various statewide locations and are now available for use for MDEQ staff for training purposes.

***E. To fund projects identified on the Project Priority List (PPL) enabling communities to proceed during FY 2006 with the construction of facilities included in their adopted project plans.***

The DWRP provided low interest financing to 15 projects totaling over \$36 million, see Attachment 3 – Fundable Range Quarterly Report for FY 2006. Attachment 4 contains the Notice to Proceed dates for the projects funded. The MDEQ and the MMBA committed all available project funds in FY 2006.

***F. To continue to invite stakeholder participation in the development of administrative rules for conducting capacity assessments of certain public water supplies.***

There was no need for development of additional administrative rules for conducting capacity assessments during FY 2006.

***G. To ensure that funded projects have reviewed and considered the security needs of the water system.***

Project planning must include a complete description of the existing waterworks system and thorough evaluation of reliability requirements and the selection of an alternative that provides adequate security measures consistent with the Ten State Standards (April 2003 Policy Statement on Infrastructure Security for Public Water Supplies). The issuance of the required SWDA construction permit necessitates a review of construction drawings/specifications by the WB District Engineer for compliance with these standards. The MDEQ review and approval of planning and design documents provide the opportunity to insure that the water supplier's consultant has considered/included adequate security measures in the selected alternatives, a prerequisite to the commitment of DWRP funds.

## **VI. ESTABLISHMENT OF INTEREST RATES**

The primary advantage for Michigan water suppliers is their ability to borrow funds at below market rates. The DWRF interest rate is established prior to each new fiscal year. As identified in Part 54, Clean Water Assistance, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended, determination of the interest rate is based on demand, market conditions, program costs, and future needs. Since a portion of the state match in any given fiscal year may be financed with state revenue match bonds, the upcoming year's interest rate must also account for the expense incurred in securing the bonds.

The DWRF is unique when compared to the SRF, in that both municipal and non-municipal water suppliers may participate if they are qualified. In assessing the market conditions for each type of entity, it was quickly apparent to the MDEQ staff that a municipality would enjoy lower rates of interest on the open credit markets than would a private, non-municipal supplier who would normally have to obtain taxable financing through commercial lending institutions.

Based on the knowledge that market conditions generally demand higher rates of interest for non-municipal borrowers, and considering limitations of having to serve them through a direct, non-leveraged program structure, the director of the MDEQ has determined that the DWRF will provide similar subsidy rates to both municipal and non-municipal borrowers. The interest rate in FY 2006 was 2.125 percent for municipal borrowers, and a 2.125 percentage point buy-down of interest for private water suppliers, although no private water suppliers were on the PPL.

## **VII. ADVANTAGES OF THE DWRF**

Apart from the low interest rate, suppliers also benefit from the DWRF in that they can finance all eligible waterworks system costs. The major benefit results from the fact that water supply financing in the past has always been left to the local units of government or private entities. Historically, there has been no significant state financial assistance available to local officials in meeting water supply needs. The DWRF will provide an on-going source of funding to maintain or improve drinking water quality and public health. In addition, the on-site technical assistance, opportunities for source water assessment and protection, operator training and certification program, and the abandoned well management program provide a blend of direct and indirect aids to local communities across Michigan.

## **VIII. ALLOCATION OF FUNDS**

Allocation of funds among eligible uses is based on a three-step process. First, the MDEQ and the MMBA identify the new sources of funds to be added to the revolving fund and the spending limits for the DWRF within the given fiscal year. Next, a determination of the type and amount of financial assistance necessary for each supplier is made. Finally, funds are allocated among the projects consistent with amounts available and the project's priority standing.

The following identifies the new sources of funds available to the DWRF in FY 2006:

FY 2006 Title IX Funds	\$29,466,900
FY 2006 State Match (general fund and state match revenue bonds)	<u>\$ 5,693,380</u>
<b>TOTAL</b>	<b>\$35,160,280</b>

There is an additional cash match of \$1,440,109 spent in FY 2006 from the Public Water Supply Fee program administered by the WB. This amount meets the dollar-for-dollar

match requirement for source water protection, capacity development, and operator certification.

The governor of each state may, at his or her discretion, transfer 33 percent of available moneys between the SRF and the DWRF programs. This may occur starting one year after a state receives its first capitalization grant for project funds. This option was not exercised during the period covered by this annual report.

## **IX. EPA PAYMENT PROCESS**

As the federal capitalization grants for the set-aside funds were awarded, EPA processed payment requests for increases to the state's draw capabilities via the Automated Standard Application for Payments system. In FY 2006, the MDEQ and the MMBA processed \$44,091,956 in actual disbursements. This included \$1,085,555 disbursement requests for the MDEQ and the MMBA administrative costs. Non-administrative set-aside requests totaled \$2,708,626

## **X. ASSURANCES**

The final guidelines from the EPA set forth provisions that the state must give certain assurances in order to qualify for capitalization grant funding. These assurances were incorporated into the Operating Agreement signed by the EPA, the MDEQ, and the MMBA on December 9, 1997. Along with federal and state law, the Operating Agreement serves as the framework by which Michigan's DWRF program operates. The MDEQ and the MMBA have fulfilled the stated assurances throughout the operation of the DWRF during this fiscal year. The Capacity Development and Operator Certification annual set-aside reports will be submitted by the Water Bureau, when complete, as required by the Safe Drinking Water Act.

Michigan agreed to fair share objectives of 3 percent for Minority Business Enterprise and 5 percent for Women's Business Enterprise in FY 2006. In an attempt to meet the objectives, Michigan included a reporting requirement as a special condition in all supplemental agreements executed between the loan recipient, the MDEQ and the MMBA. Actual participation rates in FY 2006 for Minority Business Enterprise were 0.13 percent and for Women's Business Enterprise were 0 percent.

## **XI. SUMMARY**

Michigan's DWRF program continues to grow as evidenced by the \$36,925,000 loaned to communities this fiscal year. As MDEQ promotes the DWRF program and works with communities to get projects funded, we will continue to provide safe drinking water to the residents of Michigan.
